Debt Pay Off Plan

Use this worksheet to make your get-out-of-debt plan. List your debts in the order you plan to pay them off - either by highest interest rate or lowest balance. Then, in the "Pay Off Payment" column, put the monthly payment you're going to send to the focus account - the account you're working to pay off. When you've paid off one credit card, mark it off the list and update the "Pay Off Payment" column for the next credit card.
